

1. Scope 3 Emissions Target

The Company has committed to reducing its **Scope 3 greenhouse gas emissions by 55% by 2035**, compared to the 2020 baseline. This target includes emissions from suppliers, fuel use, and aircraft lifecycle operations.

2. Hydrogen Aviation Program

The Company is developing a **fully hydrogen-powered aircraft prototype** expected to enter commercial service by **2032**, supported by partnerships with over **150 global airports**.

3. Digital Twin Strategy

To optimize aircraft design and reduce emissions, the Company uses **digital twin simulations**, reducing physical testing by up to **40%**.

4. Sustainable Fuel Usage

By 2030, the Company plans to ensure that **70% of all flights** use **Sustainable Aviation Fuel (SAF)** blends.

5. AI-Driven Maintenance System

The Company has deployed an AI system that predicts maintenance needs with **92% accuracy**, reducing unexpected failures and operational downtime.

6. Carbon Capture Initiative

A pilot program aims to capture and store up to **2 million tons of CO₂ annually** from aviation-related operations starting in 2028.
